## **INTELLECTUAL/DEVELOPMENTAL DISABILITIES DEFINITION**

Intellectual/developmental disabilities affect many Montanans. Autism, cerebral palsy, and epilepsy are some conditions commonly referred to as intellectual/developmental disabilities. The definition of “developmental disabilities” as legislatively defined in section 53-20-202 of the Montana Codes Annotated (MCA), as changed by the 2013 Montana State Legislature, (HB123) is:

*‘Developmental disabilities’ means disabilities attributable to intellectual disability, cerebral palsy, epilepsy, autism, or any other neurologically disabling condition closely related to intellectual disability and requiring treatment similar to that required by intellectually disabled individuals if the disability originated before the person attained age 18, has continued or can be expected to continue indefinitely, and results in the person having a substantial disability.” (53-20-202, M C A, 2013)*
